

Safety when working aloft on a yacht should never be taken lightly. With the steady increase in the size of the family cruiser and the significant increase in the yachts at the commercial end of the spectrum, it has become even more important that proper equipment is used when hoisting crew up a mast. VMG Projects from Douglas IOM are recommending to their clients two harnesses from the "Petzl Work Solutions" range.

The NAVAHO MINIBOSS is a professional replacement to the traditional bosun's chair. Designed for prolonged working aloft, it gives significantly greater security, comfort and mobility than the standard chair. The MINIBOSS features the combination of a rigid seat and a wide semi-rigid belt for maximum comfort. The MINIBOSS has 8 equipment loops and is fully adjustable to allow comfortable and secure working in a variety of positions. The seat is also designed to fit shoulder straps, lanyards and clamps as required.

Available in 2 broad size bands. 2040g to 2230g
CE EN 358 & EN 813
£179.99 ex VAT

The NAVAHO VARIO is lightweight and simple. Unlike the sport harnesses of a similar design it is designed for suspension with wide breathable foam pads giving much greater comfort. Adjustment is quick and easy using the DoubleBack buckles and like all of the Petzl Work range there is a comprehensive array of lateral attachment points and equipment loops.

Available in 3 broad size bands. 1000g to 1200g
CE EN 358 & EN 813
£79.99 ex VAT

The PODIUM suspension seat is designed for use with the VARIO harness and is ideal for situations where there are alternate periods of climbing and suspension. The PODIUM is a rigid seat that gives excellent comfort, excellent stability and full leg mobility. The PODIUM can easily be positioned behind the users back for climbing or have greater mobility aloft.

The PODIUM is a very cost effective addition to the VARIO with the wearer gaining greater security a work harness offers over the traditional bosun's chair and the extra comfort of the PODIUM for prolonged periods aloft.

1 size. 1170g
£79.99 ex VAT
